## EMPLOYMENT

---

<b>Senior Analyst Programmer</b>	<b>China Construction Bank(Asia)</b>	<b>Dec 2022 – Current</b>
----------------------------------	--------------------------------------	---------------------------

- (Java) Developed, packaged and deployed Java microservices application with Spring Boot and Maven
- (T-SQL) Performed data patching in Production environment
- Built CICD pipeline to perform static code analysis, open source vulnerability scanning
- Communicated and cooperated with team members, vendors to analyze project requirements

<b>Backend Developer</b>	<b>FreightAmigo Ltd.</b>	<b>Jul 2022 – Dec 2022</b>
--------------------------	--------------------------	----------------------------

- (PHP) Developed, implemented and documented api for online system and mobile app
- (PHP) Reduced website loading speed by reducing api data size and class dependency
- (SQL) Wrote SQL queries for reporting

<b>Software Engineer</b>	<b>VTech Telecommunications Ltd.</b>	<b>Aug 2021 – Jul 2022</b>
--------------------------	--------------------------------------	----------------------------

- (Java) Reduced running time by **75%** by code refactoring in AWS Lambda function
- (Python) Developed serverless functions to process pre-provisioning checking of IoT devices
- (Python) Handled and updated data stored in NoSQL database by using AWS Lambda function, DynamoDB
- Developed and deployed Infrastructure as code templates to automate cloud resources creation
- Set up AWS CloudWatch metric alarms to monitor applications healthiness

<b>Survey Officer (Quantity)</b>	<b>Architectural Services Dept.</b>	<b>May 2019 – Jan 2021</b>
----------------------------------	-------------------------------------	----------------------------

- Reduced time to produce financial statements by over **85%** by building relational formulas between cells to automate the computations in Excel

## SKILLS

- 
- Python, SQL, Java, JavaScript, TypeScript, HTML, CSS, PHP
  - Amazon Web Services, Git, MacOS, Visual Studio Code, GitHub, Shell Scripting

## PROJECTS

### Trash image classifier

- A 8-layer Convolutional Neural Network machine learning sequence model implemented Adam optimizer and Relu activation function to predict whether a trash on images is made of paper, metal, plastic, or none of above.
- Increased the prediction accuracy from **55%** to **75%** by improving prediction algorithm

## CERTIFICATES

- 
- |   |                                  |                     |
|---|----------------------------------|---------------------|
| • AWS Certified Solutions Architect - Associate | Amazon                           | Jan 2022 – Jan 2025 |
| • Using Databases with Python                   | University of Michigan, Coursera | Nov 2020            |
| • Using Python to Access Web Data               | University of Michigan, Coursera | Oct 2020            |
| • Python Data Structures                        | University of Michigan, Coursera | Sep 2020            |

## EDUCATION

---

<b>Tecky Academy</b>	<b>Hong Kong</b>	<b>Feb 2021 – Jun 2021</b>
----------------------	------------------	----------------------------

- MicroMaster in A.I. & Programming

<b>City University of Hong Kong</b>	<b>Hong Kong</b>	<b>Sep 2012 – Jul 2015</b>
-------------------------------------	------------------	----------------------------

- Bachelor of Science (Hons) in Surveying

## LANGUAGES

---

- Proficient in written and spoken: English, Chinese
